WORK EXPERIENCE

Ruby Software   Jan 2015 - Present

Software Engineer

Revremit

We have a full Time project called Revremit is a specialized Health Care product to convert paper
EOBs into ANSI 835 files.This product receives scanned EOBs and 837 billing files as its inputs and
delivers reliable, high quality 835 files as the principal output. There are many forms of outputs like Image Output, Excel
output,custom Output like text format etc, Also a dedicated grid portion of the system which allow the user to capture the
values and used for the output. The output can be generated on timely fashion, For that we have rakes to generate and
cron jobs schedule the output.
Rails : 3.1.2, ruby:1.9.3

Successdart

is an Employee Evaluation tool to analyse the employee Performance, It is a Product of our company.
1.Provision to create template for each departments
2. Templates are sent to employees when the particular day Say month end.
3. employees updated their part (self Evaluation) and revert.
4. This is now currently checked by manager and updated from(Manager Evaluation) his/her End.
5. Also provision for sending this Evaluation sheet to Manager's Manager too.
6. At last the result of the evaluation will be informed to Employee.
Rails: 4.1, Ruby: 2.2

Factum

This app is used to keep track of invoices in all its states and transitions through issuers, clients,brokers and investors
Rails: 5.1, Ruby 2.4

EDUCATION

Btech   Jun 2012 - June 2015

Adishankara College of engieering and Technology

Diploma in Computer Engineering   April 2007 - June 2010

Govt Polytechnic College Perumbavoor

INTERESTS

1. Blogging with Octopress(jekyll)
2.Reading Books
3. Testing with Travis CI to

OPEN SOURCE CONTRIBUTIONS

Blogging
Started blogging using the jekyll octopress blog , via anoobava.github.io

Blog App
started creating a Blog App, to include the features in the medium

Penmig
A Gem which will run all the migrations before you start your development, Currently on the plan with executing when a

Pull is happend.

Chrome Extension
Created chrome Extensions to understand the workflow and created a facebook block chrome extension, code is

available in github.
